

How work with instazood?

HOW INSTAZOOD WORKS

FOLLOW

following is the best way to introduce your page to the others, it means that Instazood bot follows someone by your Instagram page and that person will come to your page for see who has started to following him/her and if he/she was interested in your field of activity, he/she would follow you. Of course you can do the same by your own (as I was doing before create this bot) but how many persons you can follow in a day?! And in addition for not being blocked by Instagram, you need to do following every some hour during the 24 hours of the day, but are you free all the day to do that?!

LIKE

it is almost the same with follow, Instazood bot likes other people posts and when they see you liked their photos, for sure they will come to your page to know who are you, and if they were interested in your field of activity, they would start to follow you. Again you can do it yourself and Instagram has some limitations for doing that. But with Instazood bot there is no limitation and it will do thousands of likes instead of you.

COMMENT

Instazood bot even writes comments instead of you in other peoples' posts. you can manage the content of comments easily. the person that you wrote a comment for him/her will come to check you out and probably will follow you.

How to add Instagram account

After registration you need to add your instagram account to Instazood bot, but before that please read this tips carefully:

1. Be sure that the E-mail you have used for registration is real and you have access to it.
2. Publish your profile picture and at least 5 more posts by your mobile phone.
3. Your account MUSTN'T be private.
4. Do not have sexual or violation pictures, because you will be blocked by Instagram.
5. Enter your Instagram account easily.

For add your instagram account to Instazood bot, first enter your user name and password and then click on the 'add account' bottom. After that you must enter your instagram with you mobile phone, in there a message will ask you a question and you must click on the 'it was me' bottom. Now one more time push the bottom 'add account' and it is finish.

It Was Me

It Wasn't Me

Get follower

For start using Instazood you need to go to 'get follower' part. Then you must click on 'new target' bottom to new targets. These targets could be pages or hashtags. We will talk about good targets at the end of this PDF.

Add promo pages

In the opened window, you can choose some pages as a target for getting follower.

Try to choose the pages that have so many followers and the same field of activity like you.

For example, if you add your coffee shop account to Instazood, target famous coffee shop pages with a lot of followers or pages that are related to coffee, cake etc.

It is free to add as many as pages that you want, but our recommendation is between 3 to 10 target pages.

*Recommendation : Do **Not** choose 'Only active users' for increase the efficiency.

Add new promotion

Followers Hash-Tag Targets

Here you should start typing popular Instagram username. Enter such username so that followers of that Instagram account may be interested in your posts. ?

Instagram account

@ Enter Instagram account name

Only active users ?

Add Promo

Add target hashtags

You can also target hashtags. For that in the 'add new target' window click on the hashtag tab and then choose one of the 'owner' or 'interested' tabs. Write the hashtag that you want and click on 'add target' bottom.

Owner means the persons who have used this hashtag.

lovers means the persons who have liked this hashtag's posts

*Recommendation: choose hashtags which are related to your field of activity.

The screenshot shows a dark-themed dialog box titled "Add new promotion" with a close button (X) in the top right corner. It features three main tabs: "Followers", "Hash-Tag", and "Targets". The "Hash-Tag" tab is currently selected. Within this tab, there are two sub-tabs: "Post owner" (highlighted in green) and "lovers" (highlighted in red). Below these sub-tabs, there is instructional text: "Here you should start typing popular Instagram hash-tag. Enter such hash-tag so that owner of posts with that hash-tag may be interested in your posts. ?". Underneath the text is a text input field with a "# " prefix and the placeholder "Enter Instagram hash tag". At the bottom of the dialog is a green button labeled "Add Promo".

Manage targets

In Instazood bot, you can manage each target individually and see its percent of success. You can check the number of followings, likes or comments of every target. Also you can turn off each of these activities for every target.

*Recommendation: delete targets which have less than %15 of success after 24 hours and like this Instazood can focus on better targets and increase your followers better.

The screenshot shows the target management interface for the user @selenagomez. The interface is divided into several sections:

- Statistics:** Likes: 212, Comments: 75, Follows: 688, Skipped: 2651.
- Performance:** Coverage: 975, Conversion: 46.6%.
- Status:** Active.
- Controls:** Three toggle switches for "On" (deactive auto likes, deactivate auto comments, deactivate auto follows), a green "stop this promo" button, and an orange "delete" button.

A red callout box points to the "Conversion: 46.6%" value, stating: "The success rate of this target".

HOW TO CHOOSE TARGETS

We offer you four ways to choose your targets:

instazood telegram channel:

you can join the channel and be aware of latest recommended targets.

Top posts of every hashtags:

you can search a related hashtag and see top posts that instagram bring it to you (first 9 posts which instagram separate from the others), these top posts belong to the pages which have so many active followers. These pages are your target pages and this is the best way to find target page.

Search in instagram :

you can search a word that is related to your field of activity and instagram will show you some pages that are more active and have more visitors about that particular word.

Celebrities' pages :

you can use celebrities' pages as a target page especially the one which are related to your field of activity

How to understand if a page has real followers

You can understand if an account has real followers or it has just fake followers by check the number of likes under each post of it. For example an account with 10k follower must have at least 500 likes under its recent posts. More likes and comments mean active followers which is what you are looking for!
